TITLE : PORTABLE IMAGE PROJECTOR AND
PORTABLE IMAGE DISPLAY DEVICE

ABSTRACT : PROBLEM TO BE SOLVED: To provide a portable image projector and a portable image display device that easily projects or displays an image based on image data received by radio communication in a satisfied size.

SOLUTION: A main body section 101 being a radio communication device receives image data through radio communication, transmits the image data to a projection function section 102 in a form of a very weak radio wave, and the projection function section 102 projects an image formed based on the image data to an object to be projected. The projection function section 102 is of a headphone type and easily mounted on a human body.
